KALIPSO Mobile Application Generator Now Available for CipherLab Windows® Mobile Computers

*Easy, Fast, and Intuitive for Cost-Effective Application Generation, Database
Synchronization, and Mobile Terminal Management*

Taipei, Taiwan – 31st, August, 2011 – CipherLab, a leading innovator in Automated Identification and Data Capture (AIDC) for the retail, warehouse, and distribution industries, today announced the availability of KALIPSO Mobile Application Generator for its mobile computers supported by Windows® operating systems. This third-party application generator software provides an easy and intuitive platform for users to create and manage applications with drag and drop, either online or offline.

“Our primary focus has always been empowering our customers with enhanced functionality that fits their unique needs, whether for the hardware or software we provide”, explained Sherman Chuang, President of CipherLab. “With KALIPSO, we provide a one-stop service, customizing programs into our Windows® mobile computers easily. We believe this will help corporates invest their time and money with better return.”

For businesses looking for solutions to power up their workflow management and cut down the efforts for device customization, KALIPSO is currently available for the newly launched CP30, and also 9300 & 9600 mobile computers. To help users get started right away, CipherLab has developed three demo programs upon the purchase of the device. Users can utilize the editable application templates to perform inventory check, order entry, and proof-of-delivery tasks.
